The first of these is the fact that the
 system of taxation is not uniform. The
 rate of tax varies from 10 to 20 per
 cent. of the value of the property. This
 is a great disadvantage, as it tends to
 create a class of wealthy people who
 can afford to pay a higher rate of tax
 than the poor. The second is the fact
 that the system of taxation is not
 based on the principle of ability to pay.
 The rate of tax is fixed, and does not
 vary according to the income of the
 taxpayer. This is also a great
 disadvantage, as it tends to create a
 class of wealthy people who can afford
 to pay a higher rate of tax than the
 poor. The third is the fact that the
 system of taxation is not based on the
 principle of benefit. The rate of tax is
 fixed, and does not vary according to
 the benefit received by the taxpayer.

The fourth is the fact that the system
 of taxation is not based on the principle
 of justice. The rate of tax is fixed, and
 does not vary according to the justice
 of the case. This is also a great
 disadvantage, as it tends to create a
 class of wealthy people who can afford
 to pay a higher rate of tax than the
 poor. The fifth is the fact that the
 system of taxation is not based on the
 principle of economy. The rate of tax is
 fixed, and does not vary according to
 the economy of the taxpayer. This is
 also a great disadvantage, as it tends
 to create a class of wealthy people who
 can afford to pay a higher rate of tax
 than the poor.

My dear friend,
I have just received your letter of the 15th and was
glad to hear from you. I am well and hope
these few lines will find you the same.
I have not much news to write at present.
I am still working on my book and hope to
finish it soon. I will write again when I have
more news to tell you.

I am sure you are doing well and hope
these few lines will find you the same.

The first of these is the fact that the
 system is not a simple one, but a
 complex one, involving many factors
 which are not yet fully understood.
 The second is that the system is not
 a static one, but a dynamic one,
 which changes as the system evolves.
 The third is that the system is not
 a closed one, but an open one,
 which interacts with the environment.
 The fourth is that the system is not
 a linear one, but a non-linear one,
 which exhibits complex behavior.
 The fifth is that the system is not
 a deterministic one, but a stochastic
 one, which is subject to random
 fluctuations.
